PASSED AUDITS (26)

Show

Accessibility

These checks highlight opportunities to [improve the accessibility of your web app](#). Only a subset of accessibility issues can be automatically detected so manual testing is also encouraged.

ARIA

▲ [aria-*] attributes do not match their roles

▲ ARIA input fields do not have accessible names

These are opportunities to improve the usage of ARIA in your application which may enhance the experience for users of assistive technology, like a screen reader.

NAMES AND LABELS

▲ Buttons do not have an accessible name

▲ Image elements do not have [alt] attributes

▲ Links do not have a discernible name

These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

CONTRAST

- ▲ Background and foreground colors do not have a sufficient contrast ratio. ▼
-

These are opportunities to improve the legibility of your content.

ADDITIONAL ITEMS TO MANUALLY CHECK (10)

Show

These items address areas which an automated testing tool cannot cover. Learn more in our guide on [conducting an accessibility review](#).

SEO

These checks ensure that your page is following basic search engine optimization advice. There are many additional factors Lighthouse does not score here that may affect your search ranking, including performance on [Core Web Vitals](#). [Learn more about Google Search Essentials](#).

CONTENT BEST PRACTICES

- ▲ Document does not have a meta description ▼
- ▲ Links do not have descriptive text — 1 link found ▼
- ▲ Image elements do not have [alt] attributes ▼

Format your HTML in a way that enables crawlers to better understand your app's content.

MOBILE FRIENDLY

- Tap targets are not sized appropriately — 78% appropriately sized tap targets ▼

Make sure your pages are mobile friendly so users don't have to pinch or zoom in order to read the content pages. [Learn how to make pages mobile-friendly](#).

PWA

These checks validate the aspects of a Progressive Web App. [Learn what makes a good Progressive Web App.](#)

INSTALLABLE

- Web app manifest or service worker do not meet the installability requirements — 1 reason

PWA OPTIMIZED

- Does not register a service worker that controls page and `start_url`
- Is not configured for a custom splash screen **Failures: No manifest was fetched.**
- Does not set a theme color for the address bar.
Failures: No manifest was fetched, No ``<meta name="theme-color">`` tag found.
- Content is sized correctly for the viewport
- Has a `<meta name="viewport">` tag with `width` or `initial-scale`
- Manifest doesn't have a maskable icon **No manifest was fetched**

ADDITIONAL ITEMS TO MANUALLY CHECK (3)

Hide

- Site works cross-browser ▼
- Page transitions don't feel like they block on the network ▼
- Each page has a URL ▼

These checks are required by the baseline [PWA Checklist](#) but are not automatically checked by Lighthouse. They do not affect your score but it's important that you verify them manually.
